Feature: ERS Logins and Requests

User Stories:

- ➤ **As a user I want to login/logout using the correct credentials and not be using the wrong credentials.**

- ➤ **As a user who is an employee, I want to see my reimbursement information and be able to make reimbursement requests.**

- ➤ **As a user who is a manager, I want to see information on employees' reimbursements and be able to approve or deny reimbursement requests.**

Acceptance Criteria:

Scenario 1: User is on ERS home page and logins with wrong credentials.
Given User is on ERS home page
When User enters the wrong credentials
And User clicks the submit button
Then User is redirected to the ERS home page
